Reason for allowance

1. This communication is in response to applicant's 01/19/2009 Amendment in the application of Joseph et al. for a "System and method for VoIP and facsimile over IP (FoIP) calling over the Internet" filed 08/25/2003. This application is a CIP of 10/298,208 filed 11/18/2002 is now US Patent#7,529,225, which claims priority from provisional application 60/331,479 filed 11/16/2003, and is a CIP of 10/094,671 filed 03/07/2002 is now US Patent# 7,391,731. This application is a Request for Continued Examination (RCE) under 37 C.F.R. 1.114 filed on August 18, 2008. Applicant's amendment and response has been entered and made of record. Claim 2 has been canceled per Applicant's request and claims 1, 3-5, 9, 13-14 have been amended. The claims have been amended to better point out and more distinctly claim subject matter comprising the invention.
2. Claims 1, 3-18 are allowable as evident by applicant's amendment (Claims are renumbered as 1-17 respectively).
3. The following is an examiner's statement of reasons for allowance: The instant application is deemed to be directed to a no obvious improvement over the prior art of record. The improvement comprises a method for routing telephone calls over the Internet between an originating gateway and a destination gateway, comprising: identifying at least one destination gateway that routes telephone calls to a destination telephone; selecting an optimal route from a plurality of routes, wherein each route includes an originating gateway that sends data packets to

destination gateways, and wherein the originating gateway on the optimal route comprises a source gateway; making a first call setup attempt by sending data packets containing a first call setup request from the source gateway to a destination gateway; receiving a message from the destination gateway indicating that the first call setup attempt has failed; inserting header data into digital data packets containing a second call setup request; and making a second call setup attempt by sending the digital data packets containing the second call setup request to a destination gateway from an alternate originating gateway other than the source gateway, wherein the header data inserted into the digital data packets containing the second call setup request ensures that a message indicating that the second call setup attempt has failed is sent from the destination gateway to the source gateway, even though the digital data packets containing the second call setup request were sent to the destination gateway from an alternate originating gateway other than the source gateway, as specifically recited in the claims.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
